

The ForMax groundbaits are developed in the laboratories of Fly Fish on the basis of scientific innovations and long-year experience of well known fishing clubs. The groundbaits are produced by FLY FISH EOOD according to state-of-art technology using high-quality natural flours: crop and wheat sub-products, proteins and hydrolyzates rich in various amino acids, grounds, fish flours, soya granulates, natural seeds selected for every particular fish species, coloring agents, natural identical flavors, dried up fruits, herb extracts, spice mixes.

Spice extracts and mixes are adding specific stimulants making the groundbaits irresistible to the various fish species. Coarse and fine colored particles rich in carbohydrates saturate the zone and extend the perimeter of effect. Strongly gluing natural additives hold up groundbait washing away and keep fish within the catch zone for a long time. To improve the groundbait effect we are recommending: Sieve after have mixed with water! Add dry or liquid concentrated aromas of the ForMax series! Add white worms or cut into pieces muckworms!

GLUE

The ForMax Glue is perfect for gluing small balls of your maggots (white worm or pinky). Remove beforehand any sawdust and clean maggots from the slime. Moist slightly (but do not damp) the maggots and add ForMax Glue on. Maggots will become gluey and balls of desired size may be formed. Fine sand may be added at will to make balls heavier. Once in water balls will break up quickly.
Contents: carbohydrates extracted from wheat and corn

SPRAY

Concentrated aroma in pulverizer for all fish species. It is a highly efficient spray with wide range for diverse usage. Spraying the groundbait by this spray will improve much fish nibbling. Does not dissolve PVA.

AMINO DIP

DIP-Carp Pro contains special recipe of selected biologically active amino-acids in combination with carbohydrates. DIP-Carp Pro reveals its powers with the ForMax products. Dip the bait previously in for 1-60 minutes.
Content: Amino-acids, carbohydrates, concentrated flavor, color agents.

FAT DIP

DIP-Carp Pro contains special recipe of selected fat acids with vegetable origin in combination with appropriate flavors and color agents. Dip the bait previously in for 1-60 minutes.
Does not dissolve PVA.
Content: Fat acids, concentrated flavor, color agents.

PASTES

Sticky protein paste of natural flours in combination with fast carbohydrates, appropriate aromas, coloring agents and seeds attracting fished immediately in the zone of fishing. Put directly in spring or in basket. If necessary add some water and seal with FLAVOR MAGIC POWDER. For irresistible "exploding" effect mix previously equal quantities of EXPLODE BAIT PELLETS and protein paste and then put on spring.

DRY FLAVOR

The CarpPro flavor contains specially selected nature-identical flavors with long-lasting attractive affect and coloring agents. Coloring agents react only to contact with water.

Method of application:

In dry: 5-10 g flavor per 1 kg groundbait or mix for protein balls; 1-3 g flavor per a small box with white worm. The result is attractive powder coat on your bait.

Solution: Dissolve 10 g flavor in 100 ml water and dip your bait in for 1 to 60 minutes.

The CarpPro flavor reveals its powers with the ForMax products.
Contents: concentrated flavor, color agents.

BARBELL

Bottom groundbait with cheese flavor especially developed for barbell and other river fish species fishing. The variety of components turns this groundbait into sticky mix appropriate for fishing in fast-flowing water. Add worms and larvae to enrich the mix.

Pack size: 1 kg ; 3 kg

COMMON BREAM

Excellent groundbait intended for bottom fishing and developed of components selected especially for common bream fishing. The groundbait possesses sweet taste, strong flavor and good binding properties. Suitable for fishing in any basins and in any season. Add some ground when fishing in fast flowing water. Add worms and larvae to enrich the mix. Pack size: 1 kg ; 3 kg

CARP

Excellent groundbait for carp and carrassius fishing. Very rich in high quality components. May be used in any basins and in any seasons. Add worms and larvae to enrich the mix.

Pack size: 1 kg ; 3 kg

GREY MULLET

Light colored with cheese fragrance. Salty, sharp taste selected specially to attract grey mullet and other similar river fish species. Excellent qualities of this mix allow to add great quantities of worms and larvae for preparation of groundbait balls.

Pack size: 1 kg ; 3 kg

COMMON NASE

Very aromatic groundbait with green base. Possesses flawless effect and dips fast to the bottom even in fast currents. Possesses as well marvelous attractive force for carp species also. Add worms and larvae to enrich the mix. Pack size: 1 kg ; 3 kg

FEEDER

Special sticky groundbait enriched with exotic components and aromatic additives making it more efficient for various fish species. Add worms and larvae to enrich the mix.

Pack size: 1 kg ; 3 kg

RIVER

Heavy and well formed groundbait with long effect for river fishing. Attracts fishes quickly. Perfect to use in locations with fast river streams. This groundbait is combined with great quantities of coarse particles keeping close fishes looking for food round the place of feeding. The unique mix of flavors is irresistible. Add worms and larvae to enrich the mix. Pack size: 1 kg ; 3 kg

LAKE

As the name presumes this groundbait is ideal to use in lakes and slow moving waters. The groundbait demonstrates high effect in water due to huge content of ground hemp attracting fishes from great distances. Combination of attractive components attracts common breams and common rudds. Add worms and larvae to enrich the mix.

Pack size: 1 kg ; 3 kg

COMMON RUDD

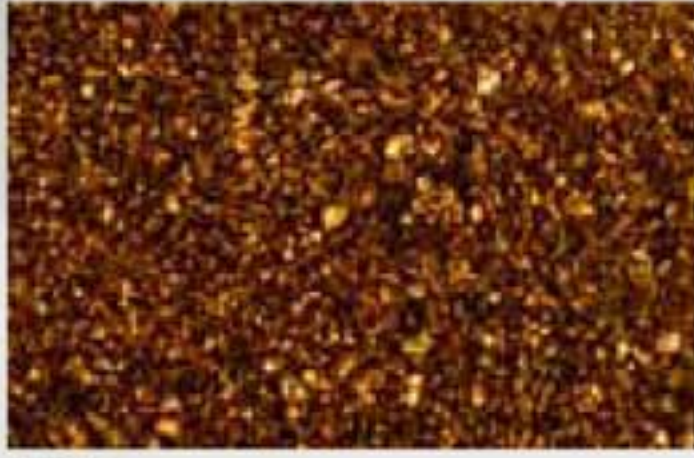

The groundbait for Common Rudd stands alone and is made of high-quality components. The distinguishable flavor of baked hemp in combination with special mix of seeds and natural chocolate particles is irresistible to big Common Rudd. The groundbait may be used in slow flowing rivers and lakes and is perfect in combination with worms and larvae. Pack size: 1 kg ; 3 kg

EXPLODE PELLETS

The new EXPLODE BAIT-PELLETS formula ensures high efficiency of fishing. Due to a special additive from the pellets starts intensive liberation of bubbles and particles floating up to the surface and sinking then down onto the bottom. Such movement of groundbait particles attracts and keeps fishes close by. Alternatives of flavors and colors contribute to attract various fish species.

Attention: Cast pellets with a sling in the area of swimmer. Action starts immediately. Repeat with the same doze after 20-30 minutes. Pack size: 0,800 kg

HEMP

Another bait particle could hardly keep close fish in the basin for longer than baked hemp. Hemp is the secret "weapon" of many fishermen. Add hemp to your groundbait to make it more attractive.

Pack size: 0, 500 kg

FRENCH CARP

Developed by leading French clubs with appropriate coarse texture selected especially for big carp. The groundbait is made in several unique alternatives: banana fish/Caribbean banana and fish mill/, honey and cinnamon, crop and scopex.

Pack size: 1 kg ; 3 kg

SMALL SIZE FISHES

Developed by leading French clubs, adapted for all species of small-size fishes, with saturated fruit flavor and red base. Fine colored particles scattering in water irritate fish and contribute to it gathering round the place of feeding.

Pack size: 1 kg ; 3 kg

TROUT

Developed for all predatory fishes and big trout both in cold and in hot waters. Enriched with fish flours, dried white worm, red worm and blood plasma increasing much the range of groundbait effect.

Pack size: 1 kg ; 3 kg

CARP STRAWBERRY

Developed for fishing of all carp species. Red hue, selected mix of additives woodland strawberry flavor make the groundbait unique taken alone. Suitable as well for feeder and spring.

Pack size: 1 kg ; 3 kg

CARP HONEY

Groundbait with salty taste and strong flavor of acid honey and ferments, adapted for fishing of both big carps and other carp species.

Pack size: 1 kg ; 3 kg

CARP FRUIT

Groundbait with combined coarse and fine texture for fishing mainly of big carps. Added fruit particles in combination with coarse crop and fruit flavor make the groundbait irresistible to big fishes.

Pack size: 1 kg ; 3 kg

COMMON BREAM ALMOND

Developed especially for common bream fishing after long-year tests and investigations. The mix of baked seeds, amaretto flavor, crop and wheat sub-products and natural flours create ideal groundbait combination for continuous and successful fishing.

Pack size: 1 kg ; 3 kg

COMMON BREAM CHOCOLATE

Groundbait with fine base, brown color and chocolate flavor making it appropriate for common bream fishing. Specially selected components keep fishes for long within the fishing zone.

Pack size: 1 kg ; 3 kg

CRUMBS

Natural crumbs of wheat enriched with carbohydrates and appropriately colored to attract various fish species. Add your combination of colored crumbs to your ForMax groundbait for more efficient fishing.

Pack size: 0, 500kg
